

From the desk of Dr. Arvind K. Chaturvedi, Medical Director

Greetings.

Our success story continues unabated. We are glad to be rated alongside the best cancer hospitals in the world. The overwhelming support of our patients over the years has helped us attain a global stature. What sets us apart is the dedication of our doctors and the transparency of our system.

Our site specific clinics, tumor board meetings, academics & patient participation in decision making are our unique features. Our practice of PET-CT for staging and restaging of tumors and for guiding diagnostic biopsies and radiotherapy is world class.

2009 had been a year of achievements for us. IGRT and HIFU have been commissioned during the year 2009. A new minor OT complex is fully functional. New ICU and OTs are nearing completion. During 2010, we shall also achieve full functionality of our IT implementation. This will allow us seamless access to electronic medical record of patients across all OPDs and wards, right at the point of care. We believe in constantly improving our services and greatly value your feedback.

*Best wishes,
January 2010*
